## Water Bottle

*A Clear Cut Value in Quality Water Bottles*

### **Quick "E-Z" Fill Instructions**

**Fill It!** – Remove Spring Attachment and completely fill bottle.

**Cap It!** – Screw on cap tightly and flip bottle over.

**Hang It!** – Wrap Spring Attachment Hanger around bottle and attach hooks to cage to hold bottle in place.

### **Notes:**

*A few initial drops are normal while vacuum forms.*

*Temperature fluctuations or excessive cage vibration sometimes cause occasional dripping. Whenever you move your pet's home, always remove the water bottle.*

*If you have a young pet, place a small dish of water under the sipper until it learns to use the sipper tube regularly.*
