1	F	Comfort Shelf w/Ramp
1	G	Food Dish
1	H	Water Bottle

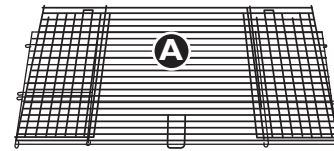

If your new pet home has experienced damage during shipping, please do not return your cage to the store.

Our Customer Service Department is available to help with any problems. Our Toll-Free Number (within the USA and Canada only) is 800-255-4527, Monday - Friday from 8:00 a.m. to 4:00 p.m. (Central Standard Time).

SAVE YOUR INSTRUCTIONS FOR FUTURE REFERENCE

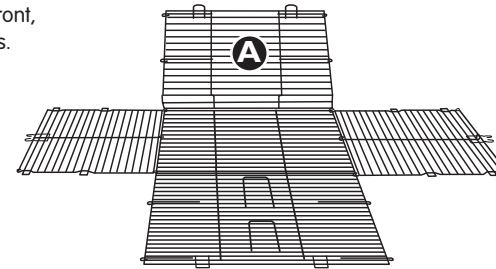

STEP 1 Unwrap Wire Panel Set

Unwrap the Wire Panels (A) and lay on a flat surface with the doorway facing upward.

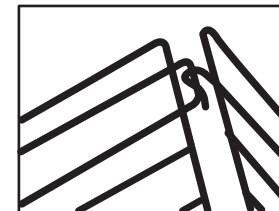

STEP 2 Unfold Wire Panel Set

Carefully unfold the Front, Back, and Side panels.

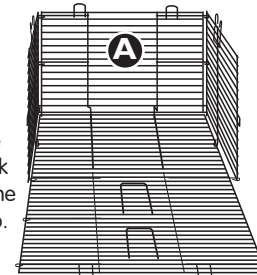

STEP 3 Lock Side Panels to Back Panel

Lock the Right and Left Side Panels onto the Back Panel.

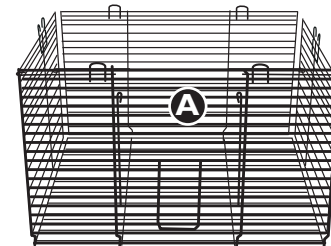

Snap the wire hook through the wire loop.

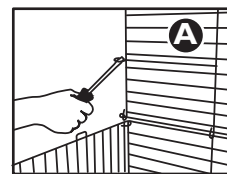

STEP 4 Lock Front Panel to Side Panels

Next lock the Front Panel onto the Side Panels.

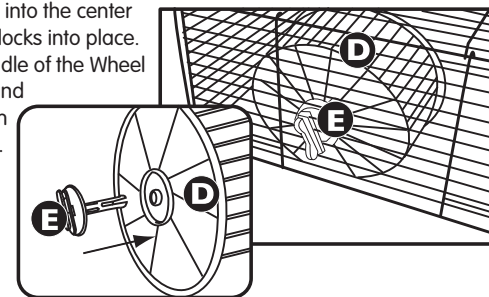

Special Note: If the wire hooks have become bent during shipping, carefully pry them open to fit into the side panel wire loops.

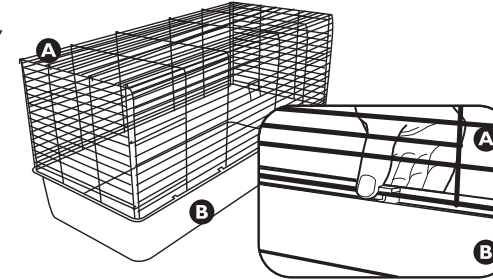

STEP 5 Attach Wheel

Insert the Wheel Hub (E) into the center of the Wheel (D) until it locks into place. Insert the E-Z Twist Handle of the Wheel Hub between the 3rd and 4th bar from the bottom of the back wire panel. Twist the Wheel Hub until it's vertical and the Wheel is locked in place.

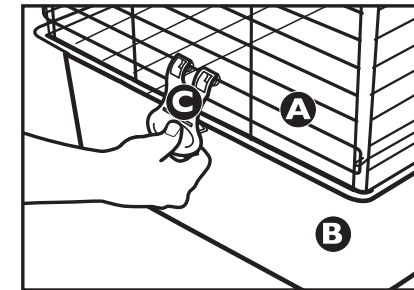

STEP 6 Lock Wire Panels into Base

Flip the wire cage over, place on top of the Plastic Base (B) and slide the wire under the attachment tabs.

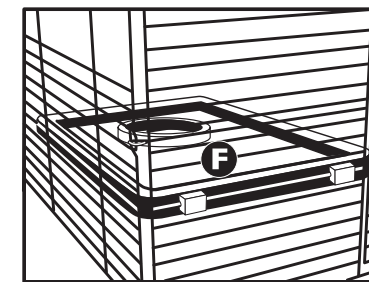

STEP 7 Attach Plastic Side Latches

Attach a Plastic Side Latch (C) to the 3rd wire bar up on each side of the cage. Be sure to snap latches under the lip on the Plastic Base (B) to secure the cage to the base.

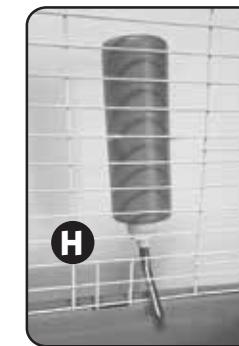

STEP 8 Position Comfort Shelf

Position the Comfort Shelf with Ramp (F) on the 8th full-length wire bar up from the bottom of the left hand side, with the opening toward the rear of the home. Press down so that the shelf locks firmly in place.

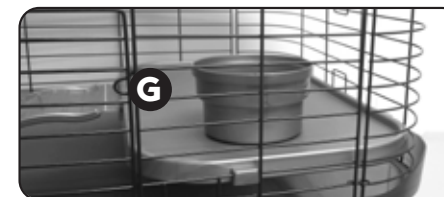

STEP 9 Add Food Dish & Water Bottle

Fill and attach the Water Bottle (H) to the outside of the habitat and secure with the provided wire latch. Be sure the Water Bottle (H) is located low enough so your pet will be able to reach the sipper. Fill Bottle completely by placing it under a light stream of running water. Close the bottle by pushing in the rubber stopper and twisting the cap. Turn the bottle upright and allow the vacuum to form. You may experience a few initial drips. When refilling your Water Bottle, never squeeze it. This may cause a fracture in the plastic and make it impossible for the necessary vacuum to form.

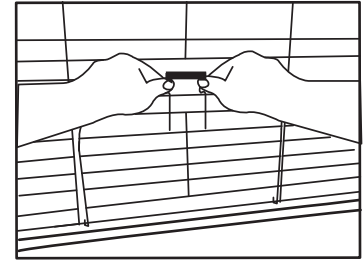

Note: Temperature fluctuations and excessive cage vibrations sometimes cause occasional dripping. Whenever you move your My First Home Habitat always remove the Water Bottle.

Place the Food Dish (G) inside of the habitat away from the Water Bottle (H) to ensure the food does not become soiled from your pet drinking nearby.

SAFETY

To safely secure your pet inside the home, firmly press the "Z-Lock" Latch behind the 2nd horizontal cage bar above the door opening.

CLEANING

To clean your pet's home, simply unsnap the Wire Panel Set (A) from the Plastic Base (B). Empty and wash the Plastic Base or spray with Kaytee® Clean Cage (Item # 63062), wipe dry, refill with fresh bedding material, and replace the Wire Panel Set onto the Plastic Base. Kaytee® Clean Cage neutralizes odors, safely cleans surfaces, and is non-toxic to all pets.
